

ELEMNT RIVAL

multisport gps watch

A SEAMLESS PERFORMANCE ADVANTAGE

ELEMNT COMPANION APP

Use the simple interface of your smartphone via our free companion app to customize settings, configure workout pages and link sensors. Store your ride history and automatically sync workouts to your favorite training apps.

PERFECT VIEW ZOOM

Perfect View Zoom allows you to zoom in and out of data fields that are most important to you.

DESIGNED TO PERFORM

The ELEMNT RIVAL is built to perform, with a high contrast color screen, easy to see in any environment. The focus is on the athlete, and trying to make the next workout, or race, a simple and pain free experience.

BATTERY LIFE

With a 24 hour battery when in GPS mode, you can tackle the longest races, and know the ELEMNT RIVAL will perform. The ELEMNT RIVAL battery will last for up to two weeks in regular smartwatch mode.

TOUCHLESS TRANSITION

Touchless Transition automatically transitions the ELEMNT RIVAL between legs of a triathlon so that you can maintain focus on your race, rather than your equipment.

KICKR CONTROL

Pairs with KICKR Smart Trainers to allow you to train in three different modes: ERG, Level or Passive to just record your workout controlled by another app.

MULTISPORT HANDOVER

Set up your RIVAL and ELEMNT Bike Computer to automatically share data between devices during a triathlon, so that you can view your race on both devices.

EDITING WORKOUTS

You are able to manually edit each leg of your triathlon or lap swim data. After the workout is synced, the athlete can modify individual legs of the triathlon by adjusting the time in that specific leg using sliders.
